

Prevent pregnancy naturally.

Lady-Comp – the intelligent fertility computer.

LADY-COMP®

Lady-Comp be in control of your own fertility.

Safe and reliable from day one with 99.3% accuracy.

The program.

A woman can only become pregnant on six days during each menstrual cycle: five days before ovulation and on the day of ovulation. Based on your morning temperature, taken orally, Lady-Comp determines your fertile days and shows when you are ovulating by recording, analyzing and storing your menstrual cycle data. It determines your daily status of fertility and will alert you on the days when intercourse may lead to pregnancy.

It's so easy!

- 1 **Take your temperature under your tongue every morning.**
- 2 **Enter menstruation on the days you have them.**
- 3 **Lady-Comp evaluates your data and calculates your fertility status for the next 24 hours:**

● = Infertile

● = Learning phase

● = Fertile

☀ = Ovulation

Fertility calendar and statistics.

With the fertility calendar and statistics you obtain valuable information about your menstrual cycle.

- Past and future fertility status.
- Menstruation forecast for the next months.
- Cycle length and length of luteal phase.
- Temperature curve and temperature rise after ovulation.
- Ovulation fluctuation in days.
- View your cycle details on your Lady-Comp or PC.

Upgrades.

You can easily upgrade your Lady-Comp with the baby planning software, Lady-Comp baby, at any time via an SD card.

Reliability is most important.

Lady-Comp's daily fertility display has a Pearl-Index of 0.7, meaning it is 99.3% accurate. The fertility computer is the uncontested leader in terms of accuracy, ease of use and safety.

Medical basics.

Biological facts:

- Every woman ovulates only once each cycle.
- If on the rare occasion two or more ovulations occur, they will occur within 24 hours.
- After ovulation, the egg can be fertilized for a maximum of 18 hours.
- Sperm can remain active and fertile in the woman's body for a maximum of 5 days.

That means:

Just on six days during each cycle pregnancy can occur, five days before ovulation and on the day of ovulation.

Lady-Comp knows:

Lady-Comp uses these biological facts and your individual cycle to reliably indicate when you are fertile or not.
